National Electronic Attachment, Inc. (NEA) and Star Byte Systems, Inc. Announces an Agreement

Atlanta, Georgia — National Electronic Attachment, Inc. (NEA) of Atlanta, GA and Star Byte Systems based in Daytona Beach, FL announced today that they have entered into an agreement to offer NEA's *FastAttach*™ electronic insurance claim attachment system to Star Byte Systems' dental clients.

FastAttach™ enables a dental office to transmit attachments (x-rays, perio charts, intra-oral pictures, narratives and EOB's), via the Internet, to NEA's repository where Insurance Payors are able to view them, in support of electronic claims. This is a significant benefit for dental offices as *FastAttach*™ accelerates claim processing and eliminates duplicating and mailing attachments.

Star Byte Systems is a comprehensive practice management system that combines virtually every aspect of running a dental office in one package. Their program efficiently handles many tasks such as electronic scheduling, automatic patient recall, multiple fee schedules, treatment planning and multiple user capability while offering many high-tech solutions such as insurance co-billing and electronic claim filing. By offering *FastAttach*™, Star Byte's client dental offices will be able to transmit attachments electronically for quicker, more efficient review by Insurance Payors.

"We are very pleased to announce our relationship with Star Byte Systems. Star Byte has a leading dental systems program and NEA is proud to have been chosen to provide electronic attachments to their users," states Tom Hughes, NEA's CEO.

"This agreement will benefit Star Byte's dental practice clients because they will save time and money in the processing of insurance claims, reduce paperwork and other costs associated with filing dental claims, and ensure prompt payment of claims", states Paul Graffeo, President of Star Byte Systems.

NEA, the leader in Internet based solutions for the dental industry, offers systems designed to make the process of insurance submissions and processing as easy as possible for the Patient, the Dental Office and the Insurance Payor.
