National Electronic Attachment, Inc. (NEA) and Discus Dental, Inc. Announces an Agreement

Atlanta, Georgia -- National Electronic Attachment, Inc. (NEA) of Atlanta, GA and Discus Dental, Inc. based in Culver City, CA announced today that they have entered into an agreement to offer NEA's FastAttach(tm) electronic insurance claim attachment system to Discus Dental's dental clients using DIRECT VISION, ENDO-VISION, and PERIO-VISION.

FastAttach(tm) enables a dental office to transmit attachments (x-rays, perio charts, intra-oral pictures, narratives and EOB's), via the Internet, to NEA's repository where Insurance Payors are able to view them, in support of electronic claims. This is a significant benefit for dental offices as FastAttach(tm) accelerates claim processing and eliminates duplicating and mailing attachments.

Discus Dental's softwares are comprehensive practice management systems that combine virtually every aspect of running a dental office in one package. Their program efficiently handles many tasks such as electronic scheduling, automatic patient recall, multiple fee schedules, treatment planning and multiple user capability while offering many high-tech solutions such as insurance co-billing and electronic claim filing. By offering FastAttach(tm), Discus Dental's client dental offices will be able to transmit attachments electronically for quicker, more efficient review by Insurance Payors.

"We are very pleased to announce our relationship with Discus Dental. Discus Dental has leading dental systems programs and NEA is proud to have been chosen to provide electronic attachments to their users," states Tom Hughes, NEA's CEO.

"This agreement will benefit Discus Dental's dental practice clients because they will save time and money in the processing of insurance claims, reduce paperwork and other costs associated with filing dental claims, and ensure prompt payment of claims", states Jim McMillen, Vice President of Discus Dental's Software Division.

NEA, the leader in Internet based solutions for the dental industry, offers systems designed to make the process of insurance submissions and processing as easy as possible for the
