National Electronic Attachment, Inc. (NEA) and Patterson EagleSoft Announce A New Agreement

Atlanta, Georgia — National Electronic Attachment, Inc. (NEA) of Atlanta, GA and the Patterson Technology Center (PTC) based in Effingham, IL announced today that they have entered into an agreement to offer NEA's *FastAttach*[™] electronic attachment system to Patterson EagleSoft (EAGLESOFT) practice management software clients.

FastAttach[™] will enable an EAGLESOFT dental office to transmit attachments (X-rays, perio charts, intra-oral pictures, narratives and EOBs), via the Internet, to NEA's repository where Insurance Payors are able to view them, in support of electronic claims. This is a significant benefit for EAGLESOFT offices as *FastAttach*[™] accelerates claim processing and eliminates duplicating and mailing attachments for dental claims.

EAGLESOFT efficiently manages both practice management and clinical tasks such as accurate accounts receivable and insurance management, electronic insurance billing, appointment scheduling, real-time tracking and referrals, fast and flexible reporting and direct digital integration to 20 digital radiography products, including SCHICK. By offering *FastAttach*[™], EAGLESOFT users will be able to transmit attachments electronically for quicker, more efficient review by Insurance Payors.

"We are very pleased to announce our continuing relationship with EAGLESOFT. EAGLESOFT is a leading practice management software program, and NEA is proud to have been chosen to provide electronic attachments to their users," states Tom Hughes, NEA's CEO.

"This agreement will benefit customers using EAGLESOFT because they will save time and money in the processing of insurance claims, eliminate paperwork and reduce costs associated with filing dental claims. It will also ensure prompt payment of these claims", states Jennifer Westendorf, Inside Sales Manager at the Patterson Technology Center.

NEA, the leader in Internet based solutions for the healthcare industry, offers systems designed to make the process of insurance submissions and processing as easy as possible for the Patient, the Healthcare Office and the Insurance Payor.
