### **National Electronic Attachment, Inc. (NEA) and Exam Technologies Int'l, Inc. (ETI) Announce an Agreement**

Atlanta, Georgia — National Electronic Attachment, Inc. (NEA) of Atlanta, GA and Exam Technologies International, Inc. (ETI), makers of The Complete Exam® (TCE) dental software, based in Afton, VA, announced today that they have entered into an agreement to offer NEA's *FastAttach*™ electronic insurance claim attachment system to ETI's dental software clients.

*FastAttach*™ enables a healthcare office to transmit attachments (x-rays, perio charts, intra-oral pictures, narratives and EOB's) via the Internet, to NEA's repository where Insurance Payors can then view this attachment, in support of electronic claims. This is a significant benefit for healthcare offices as *FastAttach*™ accelerates claim processing and eliminates duplicating and mailing attachments.

TCE software provides a comprehensive practice management system that combines virtually every aspect of running a dental office into one package. The program efficiently handles many tasks while offering many high-tech solutions such as insurance co-billing, electronic claim filing, and complete clinical back-office integration and treatment planning and much more.

Thomas Hughes, CEO of NEA, Inc., said, "We are very pleased to announce our relationship with ETI. TCE software is a leading dental practice management clinical based solution and NEA is proud to have been chosen to provide electronic attachments to their users."

Jay Altman, President of ETI, said, "Expanding our relationship with *FastAttach*™ and building the bridge to NEA will benefit TCE software customers with their daily insurance procedures. Working with *FastAttach*™ will allow further elimination of administrative burdens by reducing paperwork and other labor costs associated with filing healthcare insurance claims. By offering the *FastAttach*™ bridge, TCE client dental offices will be able to transmit attachments electronically for quicker, more efficient review by Insurance Payors, in full support of our totally electronic patient record capabilities."
