**National Electronic Attachment, Inc. (NEA) and Discus Dental, Inc.  
Announce The FastAttach Bridge in the NEW OMSVISION™**

Atlanta, Georgia — National Electronic Attachment, Inc. (NEA) of Atlanta, GA and Discus Dental, Inc. based in Culver City, CA announced today that they have entered into an agreement to offer NEA's *FastAttach*™ electronic insurance claim attachment system to Discus Dental's NEW OMSVISION product for the Oral and Maxillofacial Surgery market.

*FastAttach*™ enables a dental office to transmit attachments (x-rays, perio charts, intra-oral pictures, narratives and EOB's), via the Internet, to NEA's repository where Insurance Payors are able to view them, in support of electronic claims. This is a significant benefit for oral and maxillofacial surgery offices as *FastAttach*™ accelerates claim processing and eliminates duplicating and mailing attachments for both medical and dental claims.

Discus Dental has built OMSVISION in cooperation with the American Association of Oral and Maxillofacial Surgeons (AAOMS). This program will be the premier oral and maxillofacial surgery practice management software program in the country. This program combines virtually every aspect of running an OMS practice in one package. It efficiently handles many tasks such as implant tracking, accurate accounts receivable and insurance management, electronic and paper-based insurance billing, appointment scheduling, real-time tracking and ranking of referrals, fast and flexible reporting and correspondence functions, and seamless connections to all major digital imaging and digital radiography products. By offering *FastAttach*™, Discus Dental's clients will be able to transmit attachments electronically for quicker, more efficient review by Insurance Payors.

"We are very pleased to announce our continuing relationship with Discus Dental. Discus Dental has leading practice management software programs and NEA is proud to have been chosen to provide electronic attachments to their users," states Tom Hughes, NEA's CEO.

"This agreement will benefit Discus Dental's practice clients because they will save time and money in the processing of insurance claims, reduce paperwork and other costs associated with filing dental and medical claims, and ensure prompt payment of claims", states Lisa DeLeon, Marketing Manager of Discus Dental's Software Division.

NEA, the leader in Internet based solutions for the healthcare industry, offers systems designed to make the process of insurance submissions and processing as easy as possible for the Patient, the Healthcare Office and the Insurance Payor.
